

Curriculum Vitae/Resume

Andi Zhou

Aerospace Engineering

UMID: 25917441

ANDI ZHOU

Canadian Citizen

1929 Plymouth Road Apt#4012, Ann Arbor, MI 48105

andi.zhou1324@gmail.com

(734)-881-4192

Education

University of Michigan Ann Arbor

Ann Arbor, MI

Bachelor of Science in Engineering

Graduating May 2022

Major: Aerospace Engineering

GPA: 3.67/4.00

Clubs/Programs – Michigan Aeronautical and Science Association (MASA), Sigma Gamma Tau, Michigan

Active Aeroelasticity and Research Laboratory, AIAA

Skills

Engineering Skills: CFD, FEA, Thermodynamics, CFD-FEA Coupled Analysis, CFD-Thermal Coupled Analysis, CAD

CAE Software: CATIA, Solidworks, ANSYS, STAR CCM+, NASTRAN, Linux

Coding Language: MATLAB, Python, C++

Awards: **Dean's Honor List (2018 – 2021) | Sigma Gamma Tau** – National Aerospace Honor Society

Experience

MASA (University Rocketry Team)

Ann Arbor, MI

Rocket Fin Lead

September 2019 – Present

- Led a team of 12 in designing, simulating, and manufacturing rocket fins able to take on supersonic flight loads
- Organized design reviews, conducted engineering work sessions, led to team to eventually optimizing the apogee of our rocket by 30%
- Designed the structure to a SF of 1.5 with a loading condition of 2-degree AoA at Mach 2.77, reducing the weight of the overall rocket by 10% while maintaining the same performance at identical loading conditions
- Contacted out-of-house manufacturers; fabricated a 4-ft tall, 3-ft wide rocket fin assembly leveraging advanced sheet metal manufacturing techniques such as bump bending and brake pressing

Lead Test Engineer

- Led a team of 6 in testing the largest fin assembly that MASA has ever built
- Conducted static testing of the fin surface, analyzed data, and compared with those given in Finite Element Analysis; confirming that the error range stayed within 20%
- Investigated roll behaviors using a 5' by 7' wind tunnel; quantified moment and angular acceleration due to aerodynamic effects and explored the possibility of inertial roll coupling
- Optimized team design cycles; accelerated design duration by 70%

Active Aeroelasticity and Research Laboratory

Ann Arbor, MI

Undergraduate Research Assistant

September 2020 – May 2021

- Evaluated BWB type aircraft with NASTRAN using SOL 101, 103, 144, 145 and 400 to study its structural, modal and aeroelastic behaviors under subsonic speed with varying angle of attack and compressibility factor
- Wrote finite element codes with MATLAB, allowing for NASTRAN to iteratively solve for varying loading conditions and automatically provide the most optimized structure for the load case given

Berlin Institute of Technology

Berlin, Germany

International Research Intern

April 2019 – July 2019

- Verified drag coefficients and forces of experimental vehicles using wind tunnels measurements and compared with ANSYS Fluent results
- Optimized vehicle aerodynamic coefficient based on geometry changes guided by wind tunnel experiments and decreased the overall drag coefficient by 0.02
